👤 PROFILE

Enthusiastic and competent mobile app developer with experience in back-end as well as front-end development. Experienced in developing web based applications with PHP frameworks.

Detail oriented designer who embraces minimal, but sleek and user-friendly designs. Highly focus highly on providing best UX & UI with my designs. Skilled at print design as well as web.

Effective team player, good listener, fast and diligent learner striving for knowledge. Committed in delivering creative output. Work well under pressure and highly motivated.

👔 WORK EXPERIENCE

Aztech Technologies Pte Ltd

R&D Engineer | Mobile Apps Engineer   **2016 - Present**

Being the lead mobile app developer in R&D Team, I was in charge of developing Android & IOS app for routers, smart lights and IOT products, manage OEM apps in app stores, UI/UX development and testing for Aztech Group mobile apps. Developed apps with Firebase, RESTful APIs, Alexa, Google Assistant and latest design principles. I was involved in all stages of mobile app development from conceptualization to distribution. Collaborated and lead projects with teams from different countries. I provide Ad-Hoc assitance for web GUI developers in HTML, JS and CSS related tasks. I acquired various skills and knowledge in Aztech such as SVN, prototyping, BLE, IOT Protocols and etc.

Tech Riggers

Founder | Full Stack Developer & Designer   **2014 - 2016**

Started my own startup as a stepping stone to organize and manage my freelancing jobs professionally. Worked with numerous individuals, professionals, NGOs and entrepreneurs. Over the past few years, had the chance to wear many hats; meeting clients, gathering requirements, designing, developing, testing, support and etc. As a full stack developer and designer, I build android apps, develop web, design for print and web.

IBM Centre of Excellence (IBMCoE)

Universiti Malaysia Pahang | Internship | Developer   **2013 - 2014**

During my internship with IBMCoE, I was assigned to design and develop automation systems for smart schools. For a period of 6 months, I built a PHP based system to generate school certificates and a full-fledged cashless sales and purchase system with RFID for smart schools. Developed systems were implemented in a chosen smart school for pilot study.

🎓 EDUCATION

Bachelor of Computer Science (Software Engineering) with Honours
UNIVERSITI MALAYSIA PAHANG | 2014
26600 Pekan,
Pahang Darul Makmur,
Malaysia.
